NAMED VARIETIES OF PRIMULINUS TYPE

Not enough can be said about these beautiful strains of Gladioli. The flowers are very graceful, having retained all the daintiness of their Primulinus parents, even to the hood formed by the drooping of the upper petal. No other race of Gladioli contains such varied and beautiful tints of yellow, orange, saffron, and pink. The stems are slender but strong and tall. One bulb will often produce several flower spikes, thereby prolonging the flowering season considerably. They are especially fine for dainty decorations.

The following is a choice selection from some of the very distinct new strains.

	Each	Doz.	100
Albion. Salmon rose pink, very dainty.	\$0 18	\$1 75	\$12 00
